

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE
AMERICAN NATURALIST,
AN ILLUSTRATED MAGAZINE
OF
NATURAL HISTORY

EDITED BY

A. S. PACKARD, JR., AND EDWARD D. COPE.

ASSOCIATE EDITORS

DR. ELLIOTT COUES, DEPARTMENT OF MAMMALS AND BIRDS.

PROF. O. T. MASON, DEPARTMENT OF ANTHROPOLOGY.

ELLIS H. YARNALL, DEP. OF GEOGRAPHY AND TRAVELS.

DR. R. H. WARD, DEPARTMENT OF MICROSCOPY.

VOLUME XIV

PHILADELPHIA:
PRESS OF McCALLA & STAVELY,
Nos. 237 AND 239 DOCK STREET.
1880.

Copyrighted 1880,
BY MCCALLA & STAVELY,
For the Proprietors.

CONTENTS.

Observations upon the Habits, Structure and Development of	
<i>Amphioxus lanceolatus</i>	<i>Henry J. Rice</i> 1, 73
Sketch of North American Ornithology in 1879	<i>Elliott Coues</i> 20
Historical Sketch of the Science of Botany in North America	
from 1840 to 1858, (Continued from p. 771 Vol. XIII)	<i>Frederick Brendel</i> 25
A Sketch of Comparative Embryology. (I.—The history of the	
Genoblasts, and the Theory of Sex.)	<i>Charles Sedgwick Minot</i> 96
The Convolution of the Trachea in the Sandhill and Whooping	
Cranes	<i>Thomas S. Roberts</i> 108
The Development of <i>Moina</i>	<i>J. S. Kingsley</i> 114
The Proboscis of the House-fly	<i>G. Macloskie</i> 153
Sketch of Progress in Mammalogy in the United States in 1879	<i>Elliott Coues</i> 161
A Review of the Modern Doctrine of Evolution	<i>E. D. Cope</i> 166, 260
Concerning Amber	<i>Erminnie A. Smith</i> 179
Protoplasmic Dynamics	<i>W. S. Barnard</i> 233
A Sketch of Comparative Embryology. (II.—Fertilization of the	
Ovum. III.—Segmentation and the Formation of the Gastrula.)	<i>Charles Sedgwick Minot</i> 242
Progress of Invertebrate Palæontology in the United States for	
the year 1879	<i>C. A. White</i> 250
The Tongue of the Honey Bee	<i>A. J. Cook</i> 271
The Structure and Action of a Butterfly's Trunk	<i>Edward Burgess</i> 313
The Critics of Evolution	<i>J. S. Lippincott</i> 319, 398
Hall's Second Arctic Expedition	<i>Ellis Hornor Yarnall</i> 332
Sketch of North American Anthropology in 1879	<i>Otis T. Mason</i> 348
The Domestication of Certain Ruminants and Aquatic Birds	<i>A. E. Brown and J. D. Caton</i> 393
The Supposed Dimorphism of <i>Lithospermum longiflorum</i>	<i>C. E. Bessey</i> 417
Notice of some Aquatic Worms of the Family <i>Naides</i>	<i>Joseph Leidy</i> 421
American Work in the Department of Recent Mollusca during	
the year 1879	<i>William H. Dall</i> 426
The use of Agricultural Fertilizers by the American Indians and	
the Early English Colonists	<i>G. Brown Goode</i> 473
A Sketch of Comparative Embryology. (IV.—The Embryology	
of Sponges.)	<i>Charles Sedgwick Minot</i> 479
List of the Birds of the Willamette valley, Oregon	<i>O. B. Johnson</i> 485, 635
A Botanist in Southern California	<i>Joseph F. James</i> 492
Progress of American Carcinology in 1879	<i>J. S. Kingsley</i> 498
The Structure of the Eye of Trilobites	<i>A. S. Packard, Jr.</i> 503
The Fabrication of Aino Cloth	<i>D. P. Penhallow</i> 553
English Birds compared with American	<i>H. D. Minot</i> 561
On the Age of the Laramie Formation as indicated by its Vege-	
table Remains	<i>J. Starkie Gardner</i> 565
Notes on the Flowering of <i>Saxifraga sarmentosa</i>	<i>J. E. Todd</i> 569
Destruction of Obnoxious Insects by means of Fungoid Growths	<i>A. N. Prentiss</i> 575, 630
The Siphonophores. (I.—The Anatomy and Development of	
<i>Agalma</i> .)	<i>J. Walter Fewkes</i> 617
Do Flying Fish Fly?	<i>C. O. Whitman</i> 641
The Food of the Darters	<i>S. A. Forbes</i> 697
On the Former Extent of the Triassic Formation of the Atlantic	
States	<i>Israel C. Russell</i> 703
Notes on Stone Implements Found in New Jersey	<i>Chas. C. Abbott</i> 712
Some Noteworthy Birds	<i>Samuel Lockwood</i> 715
On the Microscopic Crystals contained in Plants	<i>W. K. Higley</i> 720, 776
The Island of Dominica	<i>F. M. Endlich</i> 761
The Sand-hill Crane	<i>J. D. Caton</i> 773
On the Origin of the Lac	<i>J. M. Stillman</i> 782
Botanizing on the Colorado Desert	<i>Edward Lee Greene</i> 787
On the Extinct Cats of America	<i>E. D. Cope</i> 833
Twin lakes and Teocalli mountain, Central Colorado, with remarks	
on the Glacial Phenomena of that region	<i>F. V. Hayden</i> 858
A Sketch of the Progress of Botany in the U. S. in the year 1879	<i>C. E. Bessey</i> 862
A Sketch of Comparative Embryology. (V.—The General Princi-	
ples of Development)	<i>Charles Sedgwick Minot</i> 871

EDITOR'S TABLE.

The Philadelphia Academy, 38, 117; The tariff on specimens, apparatus and books necessary for instruction in the sciences, 190; The Philadelphia Board of Education, 191; The Philadelphia Academy of Natural Sciences, 356; Some Pertinent Remarks in "Nature," 359; Proposed exploration of the ruins of Mexico and Central America, 359; Government aid to pure Science, 654; Biology at the American Association at Boston, 725; Obligations of Educational and Charitable Institutions, 793; The Metric System, 881; The Permanent Exhibition of Philadelphia, 881.

RECENT LITERATURE.

Geological Survey of Canada, 42; Morse's Shell Mounds of Japan, 43; Growth as a Function of Cells, 44; Williamson's Fern Etchings, 45; Recent Books and Pamphlets, 46; Notes on New England Isopoda, 120; Carcinological Papers of Paul Mayer, 121; Herrick's Entomostraca, 121; The Misses Jones and Shulze's Nests and Eggs of the Birds of Ohio, 122; Nicholson's Manual of Palæontology, 123; Recent Books and Pamphlets, 124; Dapa's Manual of Geology, third edition, 192; The Refutation of Darwinism, 192; Hallez's Natural History of Turbellarian Worms, 193; Westwood's Synopsis of Uraniidæ, 194; The Zoological Record for 1877, 194; Leidy's Rhizopods of North America, 195; Recent Books and Pamphlets, 196; Brehm's Animal Life, 280; Grenacher's Researches on the Eyes of Arthropods, 281; Dall's Meteorology of the Pacific Coast Pilot, 281; Barrande's Brachiopods of Bohemia, 282; Huxley on the Crayfish, 282; Thomas's Noxious Insects of Illinois, 283; Riley on the Cotton Worm, 283; Gilbert's Geology of the Henry mountains, 284; Batrachological Papers, 286; Osteological Contributions, 287; The Annual Report of the Hayden Survey for 1877, 360; Recent Books and Pamphlets, 360; Smith's Brazil; The Amazons and the Coast, 436; Natural Science and Religion, 436; Moseley's Naturalist on the "Challenger," 437; Clarke's Development of the Salamander, 438; Penning's Text Book of Field Geology, 438; Sketches of the Physical Geography and Geology of Nebraska, 439; Archives of Comparative Medicine and Surgery, 439; Traquair on Platysomidæ, 439; Recent Books and Pamphlets, 441; The Geology of Wisconsin, 508; Mr. Kingsley on the Crustacea belonging to Union College, 509; Crosby's Geology of Eastern Massachusetts, 509; Brooks's Development of the Oyster, 510; Thomas's Chinch-Bug, 511; The Geological Record, 511; The Midland Naturalist, 512; Rocky Mountain Health Resorts, 512; Proceedings of the Davenport Academy of Natural Sciences, 512; Hayden's Great West, 513; Verrill's Cephalopods of Northeastern America, 514; Recent Books and Pamphlets, 514; Packard's Zoology, 582; Studies from the Morphological Laboratory in the University of Cambridge, 584; The Hessian Fly, 586; A New German Geographical Journal, 588; Favre's Geology of the Canton of Geneva, 588; Recent Books and Pamphlets, 588; Some Recent Publications on Japanese Archæology, 656; Balfour's Comparative Embryology, 662; The Odontornithes, or Birds with Teeth, 664; Thomas's Noxious Insects of Illinois, 665; Transactions of the Entomological Society of London for 1879, 665; Recent Books and Pamphlets, 667; Nell's New Map of Colorado, 728; Haeckel's System of Medusæ, 729; Recent Books and Pamphlets, 730; Bessey's Botany, 796; Huxley's Introductory to Science Primers, 797; Emerton's Seaside Collecting, 798; Zittel's Palæontology, 798; Koppen's Injurious Insects of Russia, 799; Miss Omerod's English Injurious Insects, 799; White's Contributions to Palæontology, 800; The Aborigines of Victoria, 800; Recent Books and Pamphlets, 801; The Tarsus and Carpus of Birds, 882; A Manual of the Infusoria, 883; Packard's Zoology, second edition, 884; Daubree's Chemical Geology, 885; Hertwig's Chætogath Worms, 885; Wadsworth's Geological Papers, 886; Physical and Geological Results of the French Expedition to observe the Transit of Venus, 886; Sigsbee's Deep Sea Sounding and Dredging, 887; Recent Books and Pamphlets, 888.

GENERAL NOTES.

Botany.—Moths entrapped by an Asclepiad Plant (*Physianthus*) and killed by Honey Bees, 48; Prof. Heer on Sequoia, 50; Botanical Notes, 51; Fertilization of Flowers by Humming Birds, 126; Connection of the Rainfall with Forests, 127; The New Mexican Locust Tree, etc., 127; Insects caught by the *Physianthus*, 128; Botanical Notes, 128; Sexual Differentiation in *Epigæa repens*, 198; The Agency of Insects in Fertilization, 201; The Function of Chlorophyll, 204; The Humble Bee a Dysteleologist among Alpine Flower Visitors, 288; Botanical Notes, 291; Fertilization of Flowers by Humming Birds, 362; Carnivorous Habits of Bees, 363; Fungi as Insect Destroyers, 363; Twining Plants, 364; The Germ Disease Theory, 364; Botanical News, 365; Transformation of Anthers into Ovaries, 442; Additions to a Historical Sketch of Botany, 443; The Fly-trap, its First Discovery, 443; *Arenaria grønlandica* near Middletown, Conn., 444; Botanical Notes, 444; Effects of Uninterrupted Sunshine on Plants, 516; Destruction of Insects by Fungi, 516; The Origin and Survival of the Types of Flowers, 517; Botanical Notes, 517; Changes in Plant Life on the San Francisco Peninsula, 589; Botanical Notes, 592; Contrivances

for Cross-fertilization in the Ranunculaceæ, 668; Botanical Notes, 669; The Fertilization of *Aquilegia vulgaris*, 731; Plants of Nova Scotia, Cape Breton and New Foundland, 733; Botanical Notes, 735; Mechanical Cause of Quincuncial Phyllotaxy, 802; Influence of High and Moist Temperatures on Germination, 803; Nectar, its Nature, Occurrence and Uses, 803; Botanical Notes, 803; The Botany of a City Square, 889; A Dispersuous Acorn, 892; Botanical Notes, 894.

Zoology.—Changes in the Shell of *Limnæa megalosoma* produced by Confinement, 51; Influence of Poisons on Crustacea, 52; Difference in the Habits of *Scalops aquaticus* and *Scapanus americanus*, 52; The Cotton-worm Moth in Rhode Island, 53; Notes on Phyllopod Crustacea, 53; The White Bellied Swallow (*Iridoprocne bicolor*), 54; Vibration of the Tail in Racers, 54; Fork-tailed *Eumeces fasciatus* and the Variableness of this Species, 54; Zoölogical Notes, 55; Leather Turtle, 129; The Chipping versus the European Sparrow, 129; Depredations of the European Sparrow, 130; On the Torpidity of Animals, 130; Migration of Dragon-flies, 132; *Trichodina* parasitic on the Gills of *Necturus*, 133; Zoölogical Notes, 133; Bundles of Snakes, 206; Reversed *Melanthones*, 207; Laws of Histological Differentiation, 208; Ant Battles, 209; Notes on the Geographical Distribution of the Crustacea, 209; The Psorosperms found in *Aphredoderus sayanus*, 211; Structure of the Eye of *Limulus*, 212; Advent of *Passer domesticus* in North Carolina, 213; The Structure of the Tracheæ and "Peritracheal Circulation" in Insects, 213; Vitality of *Helix aspera*, 214; Zoölogical News, 214; Twenty-six Days at Sea, in an open Boat, Cruising for Whales, 292; List of Californian Reptiles and Batrachia collected by Mr. Dunn and Mr. W. J. Fisher in 1876, 295; The Gastrula of Vertebrates and the Gastræa Theory, 296; Zoölogical Notes, 296; Notes on California Fishes, 366; The English Sparrow in Newark, N. J., 368; A New Preservative Fluid, 369; The Spotted Salamander, 371; Growth as a Function of Cells, 374; *Scolopendrella* as the type of a new order of Articulates (*Symphyla*), 375; Notes on a larval *Lithobius*-like Myriapod, 376; *Trichopetalum*, 376; Dr. Chapman on the Placenta of *Ælephas*, 376; Zoölogical News, 377; The Island of Reil, 444; On the Internal Structure of the Brain of *Limulus polyphemus*, 445; The Food of Birds, 448; Zoölogical Notes, 450; The Herring of the Pacific Coast, 518; Recent Articles on Crustacea, 519; Another Black Robin, 521; Occurrence of the Bohemian Wax-wing in Western Washington Territory, 521; Rose-breasted Grosbeak and Colorado Potato Beetle, 521; Can Snails Mend their Shells, 522; Victimized Rattlesnakes, 523; *Bythinia tentaculata* Linn., 523; Color Variety of the Chipmunk, 523; Ferocious Tendencies of the Muskrat, 524; Nesting English Sparrows, 524; Bird Arrivals at Evanston, Ill., 525; *Gadus morhua* in Fresh Water, 525; Rev. Mr. Dallinger on the Theory of Spontaneous Generation, 526; Theory of Bird Migrations, 527; Albino Beaver and Squirrel, 528; Some Habits of the Pine Snake, 528; Notes on the Fish-hawks, 528; Polymorphous *Anodontæ*, 529; Preliminary Note on Branchipod Crustaceans, 531; A New Synthetic Type, 531; Zoölogical Notes, 531; Tardigrades and Eggs, 593; An Abnormal Foot in *Amblystoma*, 594; Notes on Myriopods, 594; Second Flight of Dragon-flies, 594; Breeding Habits of Spiders, 595; Notes on New and Rare Fishes of the Pacific coast, 595; Case of Protective Mimicry in a Moth, 600; Male Eels in Holland, 600; Notes on the Wintering of the Robin, 601; The Eyes and Brain of *Cermatia* forceps, 602; Zoölogical Notes, 603; A new Harvesting Ant, 669; Budding in Free *Medusæ*, 670; English Sparrows refusing to eat Worms, 671; How Insects resist Cold, 672; "Mimicry" in Snakes, 672; Notes on the Mammals of Southern Utah, 673; *Ichthyidium ocellatum*, 674; On the Course of the Intestine in the Oyster (*Ostrea virginiana*), 674; Phosphorescence of very Young Fishes, 675; Zoölogical Notes, 676; A Relation between Meteorology and the Grasshopper or Locust Pest, 735; Forster's Tern in Florida, 738; An Early Season, 738; A Fresh Water Jelly Fish, 739; Zoölogical Notes, 739; Eggs of the Tree Cricket wanted, 804; Do Flying Fish Fly, 804; Flights of "Flies," 805; *Cetonia inda*, 806; Cause of the Twisting of Spiral Shells, 806; The Young of the Crustacean *Leucifer*, a Nauplius, 806; The Frigate Mackerel, *Auxis rochei*, on the New England Coast, 808; On the Occurrence of *Freia producta* Wright, in the Chesapeake bay, 810; *Rhipidodendron splendidum*, 811; A Pale Variety of *Polyxenes fasciculatus*, 811; Zoölogical Notes, 812; The Metamorphosis of *Actinotrocha*, 894; Occurrence of the Web-fingered Sea-robin on the coast of Maine, 896; The Little Striped Skunk Climbing, 896; Voraciousness of *Chordeiles popetue* Baird, 896; Leeches on a Turtle, 896; The Organs of Smell in Insects, 897; Action of Acids and Color Light on Marine Invertebrates, 897; The Thorax of the Blow Fly, 897; The Swimming-bladder of Fishes, 898; Zoölogical Notes, 898.

Anthropology.—Anthropological News, 56; Rau's Palenque Tablet, 134; Anthropological News, 136; Ober's Carribees, 216; Mound Builders, 216; Anthropological News, 218; American Ethnology, 297; Peruvian Antiquities, 299; Peabody Museum at Cambridge, 377; The Department of Anthropology of the British Association, held in Sheffield, 1879, 378; Archæology in Indiana, 379; Anthropological News, 379; A Dictionary and Grammar of the Aimará language, 450; Anthropology in France, 451; Mr. Maclean's Contributions to Archæology, 452; The Protection of Antiqui-

ties, 454; Another Elephant Pipe, 455; Anthropological News, 455; Bibliography, 456; Syphilis, 533; Footprints of Vanished Races, 533; Spencer's Ceremonial Institutions, 534; The Oriental Origin of Metallurgy, 535; Anthropology in England, 536; Anthropology in Italy, 538; Bibliography, 538; Pueblo Indians, 603; Pre-adamites, 605; *Materiaux pour l'Histoire de l'Homme*, 607; Archaeological Hints, 608; Prof. Flower's Lectures, 608; Bibliography, 608; Maya Chronology, 676; German Anthropology, 677; Report of the Peabody Museum, 677; The American Antiquarian, 680; Archaeology in Wisconsin, 680; Cliff-dwellings in Southern Utah, 681; Bibliography, 682; Anthropology at the American Association, 740; Unsymmetric Lance points, 744; The Anthropological Society of Washington, 813; The Davenport Academy, 814; Anthropology in France, 815; Anthropology in England, 816; Bibliography, 817; New Archaeological Enterprises, 899; Japanese Mythology, 902; Burial of the Dead, 904; The American Antiquarian, 904; Mound Relics from Illinois, 905; Anthropological News, 905.

Geology and Palæontology.—Thickness of the Ice Sheet on its Southern Edge, 59; Were the Ichthyosaurs Viviparous, 60; Miocene Fauna of Oregon, 60; Pliocene Man, 60; The Water Sheds of the State of New York, 139; Geological Survey of New Zealand, 140; Hill's Kansas Explorations, 141; Hulke on Ornithopsis of Seeley, 142; Filhol on the Fauna of St. Gerand le Puy, 142; Notes on Sabre-teeth, 142; Fossil Crawfish from the Tertiaries of Wyoming, 222; On the Saurpterygia of Boulogne-sur-Mer, 223; A new Hippidium, 223; Notes on the Androscoggin Glacier, 299; Marsh on Jurassic Dinosauria, 302; Archæopteryx, 302; The Manti Beds of Utah, 303; The Skull of Empedocles, 304; A New Genus of Tapirids, 382; The Structure of the Permian Ganocephala, 383; Buthotrephis from York county, Pa., 384; The Comstock Lode, 384; Artificial Formation of the Diamond, 456; Corrections of the Geological Maps of Oregon, 457; A New Genus of Rhinocerotidæ, 540; The Geology of Southern Arizona, 541; Extinct Batrachia, 609; The Genealogy of the American Rhinoceroses, 610; Halitherium capgrandi, 611; A Genus in Anticipation, 611; Iguanodons, 612; The Geology and Topography of the Catskill mountains, 612; On the Occurrence of Footprints of Dinornis at Poverty bay, New Zealand, 682; Geological Examinations in Texas, 684; The Bad Lands of the Wind river and their Fauna, 745; Geology of Egypt and of the Libyan Desert, 818; Vertebrate Palæontology of India, 818; The Geology of the Lower Valley of the Delaware, 819; Origin of Coral Reefs and Islands, 819; The "Comptes Rendus Stenographiques," 820; Geological News, 821; The Devonian Insects, 905; America's Coal Supply, 907; The Northern Wasatch Fauna, 908; Geological News, 909.

Geography and Travels.—Hayden's New Maps of Wyoming, etc., 62; African Exploration, 64, 143; United States Geological and Geographical Survey of the Territories. Work of 1877-8. Primary Triangulation and Yellowstone Park Maps, 223; The Interior of Greenland, 304; Finsch's Expedition to the North Pacific, 306; Geographical News, 306; Asia, 385; Arctic Voyages, 458; The Howgate Arctic Expedition, 460; The Voyages of the Willem Barents and the Isbjorn in the Barents sea, 542; Circumpolar Stations—The Aurora Borealis, 544; Navigation of the Siberian Arctic ocean, 546; "Die Metamorphosen des Polareises," 548; The Ascent of the Binué, in August, 1879, 686; The Royal Geographical Society's Expedition to Lakes Nyassa and Tanganyika, 748; The Franklin Search Expedition, 821; Howgate Expedition, 824; Col. Prejevalsky, 824; Proceedings of the Geographical Section of the British Association, 909.

Microscopy.—Improvements in Cell-cutting, 65; Another Journal, 68; Adulterations in Food, 68; Exchanges, 68; Thin Glass Slide Troughs, 146; Preparations of Crystals for the Polariscope, 146; Separating Foraminifera from Sand, 148; Naturalists' Directory, 148; Hints on the Preservation of Living Objects, and their Examination under the Microscope, 225; Method of Separating Organisms from Water, 227; Agency for Exchanging Objects, 309; Exchanges of Apparatus, 309; American Society of Microscopists, 309; Observations on the Construction of the Huyghenian Eye-piece as used in Microscopes, 309; Organisms in Ice from Stagnant Water, 388; American Society of Microscopists, 389; Adulterations of Food, 461; A new "Growing Slide" for Minute Organisms, 463; Collecting and Mounting Spiders' Webs, 454; Wood-fibers for Paper-making, 465; Cleaning Cover-glasses, 465; Spodumene, 465; The Microscopical Appearance of the Valves of Diatoms, 465; The American Journal of Microscopy, 465; Microscopy at the American Association, 613; American Society of Microscopists, 613; "Science," 613; Microscopists' Annual, 614; Holman's new Compressorium and Moist Chamber, 691; Methods of Dry Mounting, 693; Permanent Microscopic Preparations of Plasmodium, 751; Permanent Microscopic Preparations of Amphibian Blood, 752; Use of Colloid in Cutting thin Sections of Soft Tissues, 825; The Atwood Cell, 825; Artificial Crystals of Gold, 826; Angular Aperture, 827; Sweating of Microscopic Slides, 827; The National Societies, 912; New Local Societies, 915.

SCIENTIFIC NEWS, 68, 148, 227, 311, 389, 466, 548, 614, 694, 753, 829, 915.

PROCEEDINGS OF SCIENTIFIC SOCIETIES, 71, 152, 232, 311, 390, 470, 552, 757, 831, 917.

SELECTED ARTICLES IN SCIENTIFIC SERIALS, 72, 152, 232, 312, 392, 472, 552, 616, 832, 919.
